Certificate Course: Embedded System Design Using ARM Microcontroller.

A certificate course on Embedded System Design Using ARM Microcontroller, was organized by department of Electronics and Telecommunication Engineering for Students of B.E. 3rd and 4th year ET as well as students of other branches. The certificate course was organized for the period of 40 hours starting from date: 27/08/2018 to 17/09/2018. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for Theory classes: TA-23 and TA-24, for Laboratory SA-04 and FA-11.

The certificate course was fully free of cost. Total 130 students have participated and completed certificate course successfully. The resource person for the whole session were

1) Prof. Balram

Timande, Balram.timande@rungta.ac.in, 9179985939

2) Prof. Nitin Naiyar, nitin.naiyyar@rungta.ac.in, 7828999066

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. This program gives learning with latest 32-bit Microcontroller of ARM Architecture CortexM0. It is designed to upgrade the skill set of engineers who has knowledge of 8-bit Microcontroller (8051/PIC/AVR).

From the overall responses received from the students at the end of the course, it has been observed that a majority of students are satisfied and have recommended for similar type of Certificate Courses to be arranged in future as it was very useful to them.

Certificates has been distributed to all participants.

-: Notice:-

For the skill development and quality engineering education higher authorities have suggested to organize certificate courses based on new technologies for minimum of 30Hrs. With reference to that department of electronics and telecommunication engineering has decided to organize 40 hrs certificate course on: "Embedded System Design using ARM Microcontroller." from date 27/08/2018 to 17/09/2018. The certificate course is free of cost for the students of all the departments. So all the department heads are requested to motivate students to participate in the above said certificate course.

Certificate Course: Design and fabrication of all-terrain vehicle

A certificate course on Design and fabrication of all-terrain vehicle was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from 02/07/2018 to 21/07/2018. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

The certificate course was fully free of cost. Total 207 students have participated and completed certificate course successfully. The resource person for the whole session were

- 1) Prof./Mr. Nitin Gupta, Assistant Professor, RCET Bhilai
- 2) Prof./Mr. Rahul Chaudhary, Assistant Professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. By this course student's understand it's utility in different area and how to model and fabricate it. Student also get practical experience of design, welding and how to use standard codes like ASME and IS code. An all-terrain vehicle (ATV), also known as a quad, three-wheeler, four-track, four-wheeler, or quadricycle, as defined by the American National Standards Institute (ANSI) is a vehicle that travels on low-pressure tires, with a seat that is straddled by the operator, along with handlebars for steering control. As the name implies, it is designed to handle a wider variety of terrain than most other vehicles.

Certificate Course: 3D modeling and finite element analysis in design of automobile

A certificate course on 3D modeling and finite element analysis in design of automobile was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from **27-08-2018 to 17-09-2018**. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

The certificate course was fully free of cost. Total 201 students have participated and completed certificate course successfully. The resource person for the whole session were

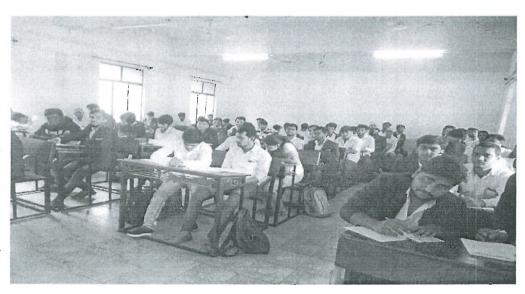

1) Prof./Mr. Rahul Chaudhary, Assistant Professor, RCET Bhilai

2) Prof./Mr. Nitin Gupta, Assistant Professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. With this course students will be able to understand the basics of finite element method and 3D modeling in the filed of automobile. FE analysis of vehicle-bridge interaction was conducted using commercial program ABACUS and ANSYS. The output of this course is to make student familiar with the ANSYS software and ABACUS software which is FEM software.

FEM is very widely used optimization technique it help the student to make projects and research. Nowadays, with the development of numerical methods, computer capabilities and computer-aided engineering (CAE) overall, the design process has become much more efficient looking this this course is farmed to provide the knowledge and understating of same.

Certificate Course: - STADPRO to Design Structure

A certificate course on STADPRO to Design Structure was organized by department of Civil Engineering for Students of B.E. 3rd year of Civil Engineering Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from date: 02/07/2018 to 21/07/2018. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for Theory classes: FB11 and for Laboratory GA-18 and GA-17.

The certificate course was fully free of cost. Total 62 students have participated and completed certificate course successfully. The resource person for the whole session were

1) Prof./ Ms. Shanu Shrivastava, Lecturer, RCET, Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies.

From the overall responses received from the students at the end of the course, it has been observed that a majority of students are satisfied and have recommended for similar type of Certificate Courses to be arranged in future as it was very useful to them.

Report On

Certificate Course: Industrial and domestic automation using ARDUINO.

A certificate course on Industrial and domestic automation using ARDUINO, was organized by department of Electronics and Telecommunication Engineering for Students of B.E. 3rd and 4th year ET as well as students of other branches. The certificate course was organized for the period of 40 hours starting from date: 28/08/2017 to 16/09/2017. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for Theory classes: TA-24 and TA-23, for Laboratory SA-04 and FA-11.

The certificate course was fully free of cost. Total 106 students have participated and completed certificate course successfully. The resource person for the whole session were

1) Prof. Nitin Naiyar,

2) Prof. S.B. Burje, sb.burje@rungta.ac.in, 9826097397

Through this course participants will learn how the Arduino platform works in terms of the physical board and libraries and the IDE (integrated development environment). Participants also learn about shields, which are smaller boards that plug into the main Arduino board to perform other functions such as sensing light, heat, GPS tracking, or providing a user interface display. The course will also cover programming the Arduino using C code and accessing the pins on the board via the software to control external devices.

From the overall responses received from the students at the end of the course, it has been observed that a majority of students are satisfied and have recommended for similar type of Certificate Courses to be arranged in future as it was very useful to them.

Certificates has been distributed to all participants.

-: Notice:-

As per the minutes of meeting of IQAC, for the quality engineering education all the departments should organize certificate courses based on new technology. With reference to that department of Electronics & Telecommunication Engineering has decided to organize 40 hrs certificate course on: "Industrial and domestic automation using ARDUINO." from date 28/08/2017 to 16/09/2017. The certificate course is free of cost for the students of all the departments. So all the department heads are requested to motivate students to participate in the above said certificate course.

Report On "A Certificate Course On Ethical Hacking"

"A Certificate Course on Ethical Hacking"

"A Certificate Course on Ethical Hacking" was organized by department of Information Technology for Students of B.E. 3rd and 4th year of Information Technology Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 40 hours starting from date: 28/08/17 to 18/09/17.

. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for Theory classes: GB-12

The certificate course was fully free of cost. Total 49 students have participated and completed certificate course successfully. The resource person for the whole session were

The main objective of the course was to introduce the students with Ethical Hacking

From the overall responses received from the students regarding the course, It has been analysed that a majority of students have recommended for similar type of Certificate Courses to be arranged as it was very useful to them. Students are satisfied with the techniques used to impart knowledge in the field of Automation.

Report On

Certificate Course: 3D modeling and finite element analysis in design of automobile

A certificate course on 3D modeling and finite element analysis in design of automobile was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from 28-08-2017 to 18-09-2017. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

The certificate course was fully free of cost. Total 196 students have participated and completed certificate course successfully. The resource person for the whole session were

Chaudhary, Assistant Professor, RCET Bhilai

2) Prof./Mr. Nitin Gupta, Assistant Professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. With this course students will be able to understand the basics of finite element method and 3D modeling in the filed of automobile. FE analysis of vehicle—bridge interaction was conducted using commercial program ABACUS and ANSYS. The output of this course is to make student familiar with the ANSYS software and ABACUS software which is FEM software.

FEM is very widely used optimization technique it help the student to make projects and research. Nowadays, with the development of numerical methods, computer capabilities and computer-aided engineering (CAE) overall, the design process has become much more efficient looking this this course is farmed to provide the knowledge and understating of same.

Certificate Course: Design and fabrication of all-terrain vehicle

A certificate course on Design and fabrication of all-terrain vehicle was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from 03-07-2017 to 24-07-2017. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

The certificate course was fully free of cost. Total 192 students have participated and completed certificate course successfully. The resource person for the whole session were

- 1) Prof./Mr. Rahul Chaudhary, Assistant Professor, RCET Bhilai
- 2) Prof./Mr. Nitin Gupta, Assistant Professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. By this course student's understand it's utility in different area and how to model and fabricate it. Student also get practical experience of design, welding and how to use standard codes like ASME and IS code. An all-terrain vehicle (ATV), also known as a quad, three-wheeler, four-track, four-wheeler, or quadricycle, as defined by the American National Standards Institute (ANSI) is a vehicle that travels on low-pressure tires, with a seat that is straddled by the operator, along with handlebars for steering control. As the name implies, it is designed to handle a wider variety of terrain than most other vehicles.

Report On "A Certificate Course On Business Analytics"

"A Certificate Course on Business Analytics" for 45 hours was arranged for the students of 4th Sem. of Management Students from 5/02/2018 to 24/02/2018. A total of 11 students enrolled themselves for the course and participated in the program. The sessions were conducted by Mr. Sushil Punwatkar The main objective of the course was to introduce the students with Business Analytics.

From the overall responses received from the students regarding the course, it has been analysed that a majority of students have recommended for similar type of Certificate Courses to be arranged as it was very useful to them. Students are satisfied with the techniques used to impart knowledge in the field of Business Analytics.

Report on

Certificate Course: "ROBOTICS"

Organized By: Department of Electronics and Telecommunication Engineering.

(2016-2017)

Dates from: 02/01/2017 to 21/01/2017

(18 Days/40 Hrs)

Prepared by: Course Coordinator Prof. Pradeep Kumar ET DEPT., RCET, Bhilai

Course Coordinator:

Prof. Pradeep Kumar ET DEPT., RCET, Bhilai

Submitted to:

Dr. Prassana Kumar

Director, RCET, Bhilai

Report: A Certificate Courses on "ROBOTICS" was organized by the Department of Electronics and Telecommunication Engineering for year 2016-2017 for the students from dates during 02/01/2017 to 21/01/2017 for 18 Days was held ET department. It was free of Cost mainly targeting students of Circuit Branches. There were 128 participants who participated in the course by the department. The participants were from different branches like ET, EEE, and Electrical.

Details of Resource person:

- Prof. Pradeep Kumar, Asst. Professor, RCET, Bhilai, Contact No: 9827946178 pradeep14335@gmail.com
- 2. Prof. Balram Timande Associate professor, RCET, Bhilai, 9179985939
 balramtimande@gmail.com

Objective of the Course:

Able to program and operate industrial robot for a given task by following necessary safety precautions and maintenance of industrial robots

The Course program started on 02/01/2017 with welcome address by Our HOD Sir, also Coordinator expressed the view on the essence of the importance of the course to the students.

On last day 21/01/2017 Certificates were distributed to the successful participants by our Director Sir, HOD and other faculties were also present. Director sir also expressed the need the importance of different tools in our life, they also appreciate our initiative to make the value addition in our students.

Theory Session and Practical Sessions were delivered by Prof. Pradeep Kumar and Prof. Balram Timande of ET department, RCET, Bhilai successfully. Their efforts in making this course was quite appreciated by the Students.

:Notice:-

As per the minutes of meeting of IQAC, for the quality engineering education all the departments should organize minimum 30 hrs certificate course based on new technology. With reference to that department of Electronics & Telecommunication Engineering has decided to organize 40 hrs certificate course on: "ROBOTICS" from date 02/01/2017 to 21/01/2017. The certificate course is free of cost for the students of all the departments. So all the department heads are requested to motivate students to participate in the above said certificate course.

Eligibility condition for the certificate of completion: Student should possess minimum 70% attendance in respective certificate course.

Report On

"A Certificate Course on DSP using MATLAB"

"A Certificate Course on DSP using MATLAB" was organized by department of Electrical Engineering for Students of B.E. 3rd and 4th year of Electrical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 40 hours starting from date: 04/07/2016 to 25/07/2016. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for Theory classes: GB-12

The certificate course was fully free of cost. Total 156 students have participated and completed certificate course successfully. The main objective of the course was to introduce the students about Signal Processing Toolbox.

From the overall responses received from the students regarding the course, It has been analysed that a majority of students have recommended for similar type of Certificate Courses to be arranged as it was very useful to them. Students are satisfied with the techniques used to impart knowledge in the field of Matlab

Report On

Certificate Course: 3D modeling and finite element analysis in design of automobile

A certificate course on 3D modeling and finite element analysis in design of automobile was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from 04-07-2016 to 25-07-2016. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

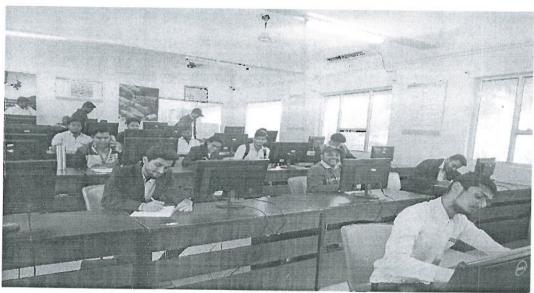

The certificate course was fully free of cost. Total 350 students have participated and completed certificate course successfully. The resource person for the whole session were

1) Mr. Shan (Carmate).
2) Mr. Nitin Gupta, Assistant professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. With this course students will be able to understand the basics of finite element method and 3D modeling in the filed of automobile. FE analysis of vehicle–bridge interaction was conducted using commercial program ABACUS and ANSYS. The output of this course is to make student familiar with the ANSYS software and ABACUS software which is FEM software.

FEM is very widely used optimization technique it help the student to make projects and research. Nowadays, with the development of numerical methods, computer capabilities and computer-aided engineering (CAE) overall, the design process has become much more efficient looking this this course is farmed to provide the knowledge and understating of same.

Report On "A Certificate Course Event Management"

"A Certificate Course on Event management" for 45 hours was arranged for the students of 1st Sem. of MBA from 04/08/2016 to 25/08/2016. A total of 35 students enrolled themselves for the course and participated in the program. The sessions were conducted by Ms. Neha Yadav. The main objective of the course was to introduce the students with how to manage an event.

From the overall responses received from the students regarding the course, it has been analyzed that a majority of students have recommended for similar type of Certificate Courses to be arranged as it was very useful to them. Students are satisfied with the techniques used to impart knowledge in the field of Event management.

Report On

Certificate Course: An Embedded system design using PIC Microcontroller.

A certificate course on An Embedded system design using PIC Microcontroller, was organized by department of Electronics and Telecommunication Engineering for Students of B.E. 3rd and 4th year ET as well as students of other branches. The certificate course was organized for the period of 40 hours starting from date: 03/08/2015 to 24/08/2015. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for Theory classes: TA-24 and for Laboratory SA-04 and FA-11.

The certificate course was fully free of cost. Total **120** students have participated and completed certificate course successfully. The resource person for the whole session were pvt Ltd., Contact No: 7065273000. Mail: info@aptronindia.com

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. A certificate course on an embedded system is designed to understand the complexity of designing in embedded systems and explain basic Intel 8051 microcontroller in detail. To provide detailed knowledge about interfacing microcontrollers with various devices through theory and practical. Different types of interfaces possible with 8051 are also covered in the course curriculum. Knowledge and skills imparted during this training is beneficial in the manufacturing of scroll message display, measuring devices, remote control applications, robotics, and many others.

From the overall responses received from the students at the end of the course, it has been observed that a majority of students are satisfied and have recommended for similar type of Certificate Courses to be arranged in future as it was very useful to them.

Certificates has been distributed to all participants.

Course Name: Certificate Course in Programming with MATLAB

Report: A Certificate Courses on "ROBOTICS" was organized by the Department of Electrical & Electronics Engineering for year 2015-2016 for the students from Dates: 01/07/2015 to 21/07/2015 for 18 Days was held EEE department. It was free of Cost mainly targeting students of Circuit Branches. There

were 79 participants who participated in the course by the department.

Resource person: Prof. Sandeep Bhad; Designation: Asst. Professor; Organization: RCET, Raipur; Contact No: 9200055529; sandeep.bhad@rungta.ac.in

Objective of the Course:

This course aims to provide students with an in depth hands on demonstration and practical sessions, With in a stimulating environment. This lab will introduce you to MATLAB as a tool for designing and Evaluating digital filters, prior to implementing them in hardware.

The participants were from branches like ET, EEE, and Electrical. Branch-wise and sem-wise number of students were as shown as:

The Course program started on 01/07/2015 with welcome address by Our HOD Sir, also Coordinator expressed the view on the essence of the importance of the course to the students.

On last day 21/01/2017 Certificates were distributed to the successful participants by our Director Sir, HOD and other faculties were also present. Director Sir also expressed the need the importance of different tools in our life, they also appreciate our initiative to make the value addition in our students.

Theory Session and Practical Sessions were delivered by Prof. Sandeep Bhad, RCET, Bhilai successfully. His efforts in making this course was quite appreciated by the Students.

A certificate course on Design and fabrication of all-terrain vehicle was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from 03/08/2015 to 24/08/2015. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

The certificate course was fully free of cost. Total 185 students have participated and completed certificate course successfully. The resource person for the whole session were

- 1) Prof./Mr. Rahul Chaudhary, Assistant Professor, RCET Bhilai
- 2) Prof./Mr. Nitin Gupta, Assistant Professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. By this course student's understand it's utility in different area and how to model and fabricate it. Student also get practical experience of design, welding and how to use standard codes like ASME and IS code. An all-terrain vehicle (ATV), also known as a quad, three-wheeler, four-track, four-wheeler, or quadricycle, as defined by the American National Standards Institute (ANSI) is a vehicle that travels on low-pressure tires, with a seat that is straddled by the operator, along with handlebars for steering control. As the name implies, it is designed to handle a wider variety of terrain than most other vehicles.

Report On

Certificate Course: Mechanical Automation with robotics

A certificate course on Mechanical Automation with robotics was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from 01/07/2015 to 21/07/2015. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

The certificate course was fully free of cost. Total 170 students have participated and completed certificate course successfully. The resource person for the whole session were

- 1) Prof./ Mr. Anand Kumbhare, Assistant Professor, RCET Bhilai
- 2) Prof./ Sanjay Sakarwade, Assistant Professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. The increased demand of current industry for efficiency and safety has led to a greater need for professionals with an added expertise in the field of 'Robotics & Automation'. Robotics & Automation combines design, construction, operation, and application of robots coupled with computer based control systems, sensory feedback, and information processing. The design of a robotic system puts together principles of electronic engineering, mechanical engineering and computer engineering. This course provides the knowledge of PLC and C++ programming. Student can run the simple robot is the beauty of this programme.

Certificate Course: Building web applications in PHP

Α

certificate course on Building web applications in PHP was organized by department of Computer Science and Engineering for Students of B.E. 4th year of CSE Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from date: 18/08/2014 to 06/09/2014. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for Theory classes and for Laboratory is Lab1 (CSE) and Lab2 (CSE).

The certificate course was fully free of cost. Total 80 students have participated and completed certificate course successfully. The resource person for the whole session was

Ms. Sonia.

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. Through this course students gained the understanding of how server-side programming works on the web.

From the overall responses received from the students at the end of the course, it has been observed that a majority of students are satisfied and have recommended for similar type of Certificate Courses to be arranged in future as it was very useful to them.

Report On

Certificate Course: ANSYS for product optimization

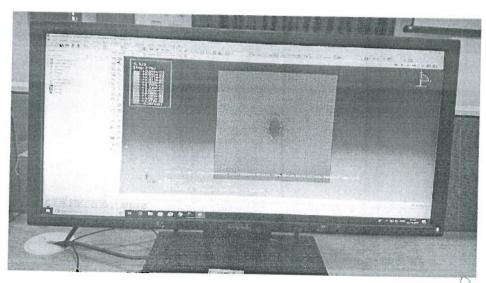

A certificate course on ANSYS for product optimization was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from 05-01-2015 to 24-01-2015. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

The certificate course was fully free of cost. Total 105 students have participated and completed certificate course successfully. The resource person for the whole session were

- 1) Prof./Mr. Rahul Choudhary, Assistant Professor, RCET Bhilai
- 2) Prof./Mr. Nitin Gupta, Assistant Professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. The objective of this course is to make student friendly with this software. Optimize the product designs through automatic parametric analysis like ANSYS software is widely preferred in industry and for that our student also sustain in this field this course is offered. This course can provide the basic knowledge of ANSYS and how it works. ANSYS structural analysis software enables you to solve complex structural engineering problems and make better, faster design decisions. With the finite element analysis (FEA) solvers available in the suite, you can customize and automate solutions for your structural mechanics problems and parameterize them to analyze multiple design scenarios. You can also connect easily to other physics analysis tools for even greater fidelity. ANSYS structural analysis software is used throughout the industry to enable engineers to optimize their product designs and reduce the costs of physical testing.

Report On

Certificate Course: Mechanical Automation with robotics

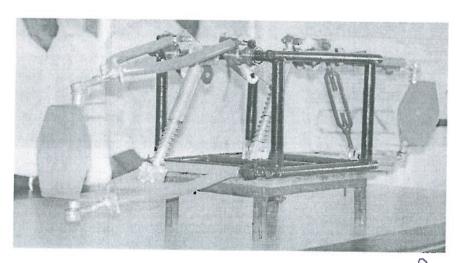

A certificate course on Mechanical Automation with robotics was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from 29-07-2014 to 18-08-2014. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

The certificate course was fully free of cost. Total 90 students have participated and completed certificate course successfully. The resource person for the whole session were

- 1) Prof./ Mr. Anand Kumbhare, Assistant Professor, RCET Bhilai
- 2) Prof./Mr. Rahul Choudhary, Assistant Professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. The increased demand of current industry for efficiency and safety has led to a greater need for professionals with an added expertise in the field of 'Robotics & Automation'. Robotics & Automation combines design, construction, operation, and application of robots coupled with computer based control systems, sensory feedback, and information processing. The design of a robotic system puts together principles of electronic engineering, mechanical engineering and computer engineering. This course provides the knowledge of PLC and C++ programming. Student can run the simple robot is the beauty of this programme.

Certificate Course: Machine design for industrial product development

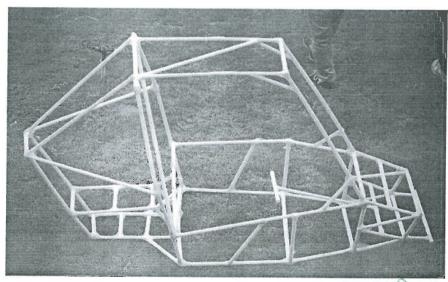

A certificate course on Machine design for industrial product development was organized by department of Mechanical Engineering for Students of B.E. 2nd, 3rd and 4th year of Mechanical Branch as well as students of other branches if they are interested in the above said certificate course. The certificate course was organized for 45 hours starting from 18-08-2014 to 06-09-2014. Timing for the classes and laboratory was daily 02 hours from 5:00 p.m. to 7:00 p.m. from Monday to Friday and for Saturday (03 Hours) from 3:00 p.m. to 6:00 p.m. For all six days Venue for classes: Mechanical computer lab.

The certificate course was fully free of cost. Total 100 students have participated and completed certificate course successfully. The resource person for the whole session were

- 1) Prof./Dr. R L Himte, Associate Professor, RCET Bhilai
- 2) Prof./ Mr. Sanjay Sakarwade, Assistant Professor, RCET Bhilai

The main objective of the certificate courses was to impart additional knowledge about new technologies either partially or fully so that students become skilled and employable in various companies. It offers students deeper understanding of the diverse topics of product and industrial design, and builds expertise in the tools and techniques to translate their visions into products. This program prepares you to explore disciplinary boundaries and encourages lateral thinking through skill-building courses in graphic representation and material prototyping. Machine design for industrial product development is very important to understand how to manufacture the industrial product for the batch production or mass production in the industry environment. Without fail execution of any work required the very systematically and proper calculation of problem this can be done by this course.
